

## **Manual for the Smart-Switch:**

the Smart-Switch include a dotted eighth tap-in function, and an Expression-Switch aka „Double-Preset“-mod as well.

### **Dotted Eighth:**

- tap in the tempo (quarter notes) on the original tap tempo-switch
- then tap in the same tempo (quarter notes) on the Smart Switch again

the wanted dotted eighth notes will be calculated internally

### **Expression-Switch aka „Double Preset“-Mod**

- first of all you need 3 already saved presets of your choice
- hold down the Smart Switch for a short moment, the color of the led is changing and you are finally on the „second bank“ of your chosen preset
- now you can change your preset as you like. Hold down the preset-switch to save these changes till the preset-led is blinking (like as the normal saving of your presets)
- now you can switch between both settings
